Contract Update

02/07/2020

Dear Site Operations Support Services Employees,

The purpose of this memo is to provide you with the latest information on the SOS4 Transition process. Beginning Monday, February 10th, WE2 will begin posting jobs on the WE28a.com website for your consideration. Please pay specific attention to the experience and qualifications required for each position as they may have changed based on the qualifications required in the new SOS4 contract. I strongly encourage all employees to apply for any position that you are qualified to perform as it will remain WE2 management's discretion as to which positions will be filled. Please begin preparing and updating your resumes now with sufficient detail to support the qualifications for the positions for which you apply. Interviews will be scheduled February 18th through February 28th. Human Resource representatives from both parent companies (WFS and E2) will be conducting the interviews and making offers beginning March 9th. Benefit meetings will be held in March for all those receiving offers from WFS and E2.

Bargaining unit and SCA positions will be filled giving preference to the existing employees. If you would like to update your resumes to add any additional training or qualifications, please contact Derek Ross.

Amentum (AECOM) will not be posting any positions. Staffing for Amentum positions on the SOS4 contract will be handled through their normal HR policies and processes.

Regards,

Dane Anderson
